PAINTS & LIME MORTARS

ORIGEN PAINTS Lime paints and coatings

Mineral paints and coatings have been around for centuries, but their popularity has increased recently. As a result, these eco-friendly paints are becoming the go-to solution for many reasons, from their cost-effectiveness and durability to their health benefits.

At **OriGen**, we mainly focus on paints and coatings based on lime – an exceptional material historically linked to our homeland. We also include silicate, another key player in restoration and sustainable construction projects.

OriGen lime paints and coatings are a great choice for any construction project as they provide a number of advantages over conventional paints, such as increased breathability or durability, making them ideal for both interior and exterior applications. In addition to improving indoor air quality through breathability and absorption of CO₂ during carbonation, they also enhance the appearance of any surface, adding depth, beauty and texture.

OriGen lime paints also offer high durability, with good resistance to weather conditions such as rain and snow, as well as to the continuous incidence of UV rays. In addition, these coatings are naturally resistant to mould and mildew, making them ideal for construction projects that would otherwise require an extra protective coat.

ORIGEN PAINTS

Decoration is an art in itself that can add beauty to any space. At **OriGen** we bring minimalism and nature, as well as a very distinctive and exclusive decoration style focused on creating a relaxing atmosphere with natural elements. Our textures and colours create a minimalist style that emphasizes the aesthetic of imperfection and nature.

In addition to our atmosphere captured on walls, floors and ceilings we can combine simple furniture and accessories to bring natural elements indoors. Walls and floors can be decorated with neutral colours, natural textures and plants to create a relaxing atmosphere.

The aim of **OriGen** is to create a welcoming and calm space, a great way to bring beauty and peace into any home or building.

**BEAUTY, MINIMALISM,
DECORATION AND NATURE**

ORIGEN PAINTS

Lime paints and coatings

One of the main advantages of using **OriGen** lime paints and coatings is that they have a high water vapour permeability while preventing water absorption. Thus, they provide ideal protection against moisture and other environmental elements. This makes them ideal for spaces with high ambient humidity or moisture-related problems.

OriGen lime paints and coatings are also a great choice for building materials such as wood and masonry surfaces as they are highly durable and resistant to cracking, chipping and colour fading.

OriGen lime paints and coatings are available in a variety of styles and a colour range to suit any aesthetic requirement. Their affordability and low maintenance make them an ideal fit for contractors looking for a cost-effective and durable solution for their building materials.

Additionally, **OriGen** lime paints and coatings are formulated free of toxic substances, VOCs, microplastics and preservatives, making them more eco-friendly, as well as healthier and safer for people.

All OriGen lime products neutralize CO2 and have a minimal carbon footprint.

ARE
ENVIRONMENTALLY
FRIENDLY

XeoGen

Silicate paint for exterior use developed with **CACO3 technology**, resulting in a very strong and durable high-quality product.

XeoGen provides a sustainable and very cost-effective solution that also contributes to creating healthier spaces.

For use in new construction and repainting, it is ideal for decorating facades and other mineral substrates.

Advantages in the application:

- High hiding power.
- Good adhesion without creating a film.
- Odourless.
- Easy to apply.

Advantages in the result:

- Mineral matt finish.
- Excellent weather resistance.
- Highly breathable and water-repellent.
- Free of preservatives, solvents and microplastics.

Available colours: white and *Harmony* and colour card.

Formats: 4L and 15L

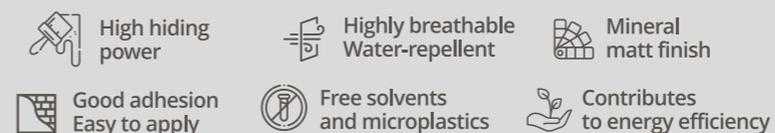

OxiGen Exterior

Lime-based mineral paint for exterior use, free of toxic substances or preservatives. **OxiGen Exterior** contains high quality artisanal lime combined with **CACO3 technology**, resulting in a hard-wearing and durable product that actively provides healthier and more sustainable environments.

OxiGen Exterior neutralizes CO2 and has a minimal carbon footprint.

For application in new construction and repainting, it is ideal for decorating facades and other mineral substrates.

Advantages in the application:

- High hiding power.
- Good adhesion without creating a film.
- Odourless.
- Easy to apply.

Advantages in the result:

- Mineral matt finish.
- Highly breathable and water-repellent.
- Free of preservatives, solvents and microplastics.
- High SRI index. Contributes to energy efficiency.

Available colours: white and *Harmony* and colour card.

Formats: 4L and 15L

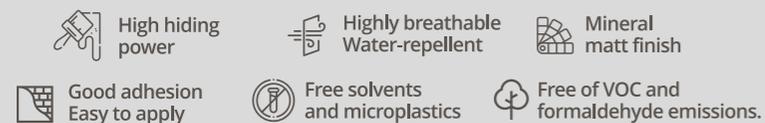

OxiGen Interior

Lime-based mineral paint for interior use, free of toxic substances or preservatives and highly breathable. **OxiGen Interior** contains high quality artisanal lime combined with **CACO3 technology**, resulting in a hard-wearing and durable product that actively contributes to improving indoor air quality.

OxiGen Interior neutralizes CO2 and has a minimal carbon footprint.

Ideal for residential use, new construction and interior decoration.

Advantages in the application:

- High hiding power.
- Good adhesion without creating a film.
- Odourless.
- Easy to apply.

Advantages in the result:

- Mineral matt finish
- Prevents condensation
- Formula free of preservatives, solvents and microplastics.
- Free of VOC and formaldehyde emissions.

Available colours: white and a selection of colours from the *Harmony* card.

Formats: 4L and 15L

EnluGen

Aerial lime stucco in paste form for interior and exterior use. Developed with **CACO3 technology**. This product is versatile, elegant, highly resistant and durable, making it ideal for high decoration projects.

In addition, it neutralizes CO2 and provides healthier and more sustainable environments.

Ideal for use in new construction, restoration and in rehabilitation of heritage buildings.

Advantages in the application:

- Good workability.
- High flexibility, adhesion and resistance.
- Odourless.
- Reduces working time and material costs.

Advantages in the result:

- Mineral matt finish.
- Highly breathable. Prevents condensation.
- High water vapour permeability.
- Free of VOC and formaldehyde emissions.

Available colours: white and *Harmony* colour card. .

Format: 15L bucket (ready-to-use product) or bi-component (4L bucket & 25kg bag - on demand in international markets).

MinerGen

Mineral consolidating sealer based on potassium silicate, free of toxic substances and highly breathable.

For use in new construction and restoration, it is ideal for sustainable construction projects and renovation of heritage buildings.

MinerGen consolidates decohesioned substrates and absorbent mineral substrates prior to the application of another mineral product.

Advantages in the application:

- Serves as silicatisation agent.
- Reduces the absorption of the substrate.
- Penetrates into the substrate without creating a film.
- Odourless.

Advantages in the result:

- Highly breathable; allows the wall to breathe.
- Highly resistant and durable.
- Low in VOC emissions and formaldehyde-free.
- Free of preservatives, solvents and microplastics.

Formats: 1L, 4L y 15L

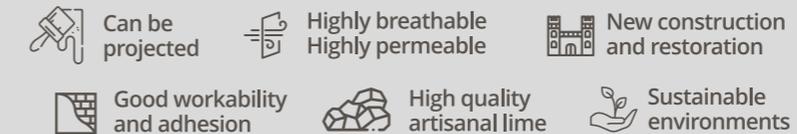

TerraGen Base

Aerial lime-based mortar with a matt mineral finish, free of hydraulic additives and highly breathable.

TerraGen Base contains high quality artisanal lime from the south of Spain, obtained from the traditional limestone burning process. The resulting product is resistant and durable, providing healthier and more sustainable environments.

For application in interiors and exteriors in new construction and restoration.

Advantages in the application:

- Good workability and adhesion on both old and new substrates.
- Excellent flexibility.
- Can also be projected.

Advantages in the result:

- Highly breathable.
- High water vapour permeability.
- Free of VOC and formaldehyde emissions.

Available colour: off-white.

Format: 25 kg bag.

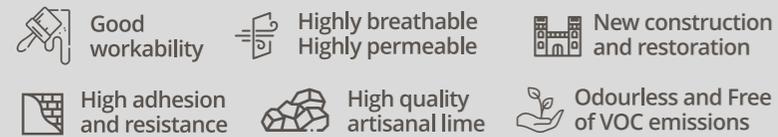

TerraGen Fino

Aerial lime-based mortar with a matt mineral finish, free of hydraulic additives and highly breathable.

TerraGen Fino contains high quality artisanal lime from the south of Spain, obtained from the traditional limestone burning process. The resulting product is resistant and durable, providing healthier and more sustainable environments.

For application in interiors and exteriors in new construction and restoration.

Advantages in the application:

- Good workability and adhesion on both old and new substrates.
- Excellent flexibility.
- Can also be projected.

Advantages in the result:

- Highly breathable.
- High water vapour permeability.
- Free of VOC and formaldehyde emissions.

Available colour: off-white.

Format: 25 kg bag.

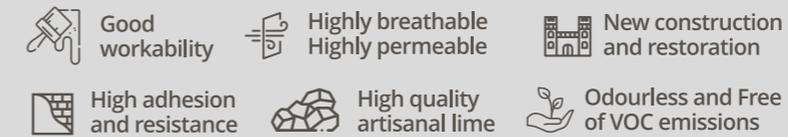

TerraGen Bi-Componente Fino

Aerial lime plaster for interior and exterior use. Developed with **CACO3 technology**. This product is highly resistant and durable and can be applied as a continuous material for both vertical and horizontal surfaces.

In addition, it neutralizes CO2 and provides healthier and more sustainable environments.

Ideal for use in new construction, restoration, refurbishment of heritage buildings and high decoration projects.

Advantages in the application:

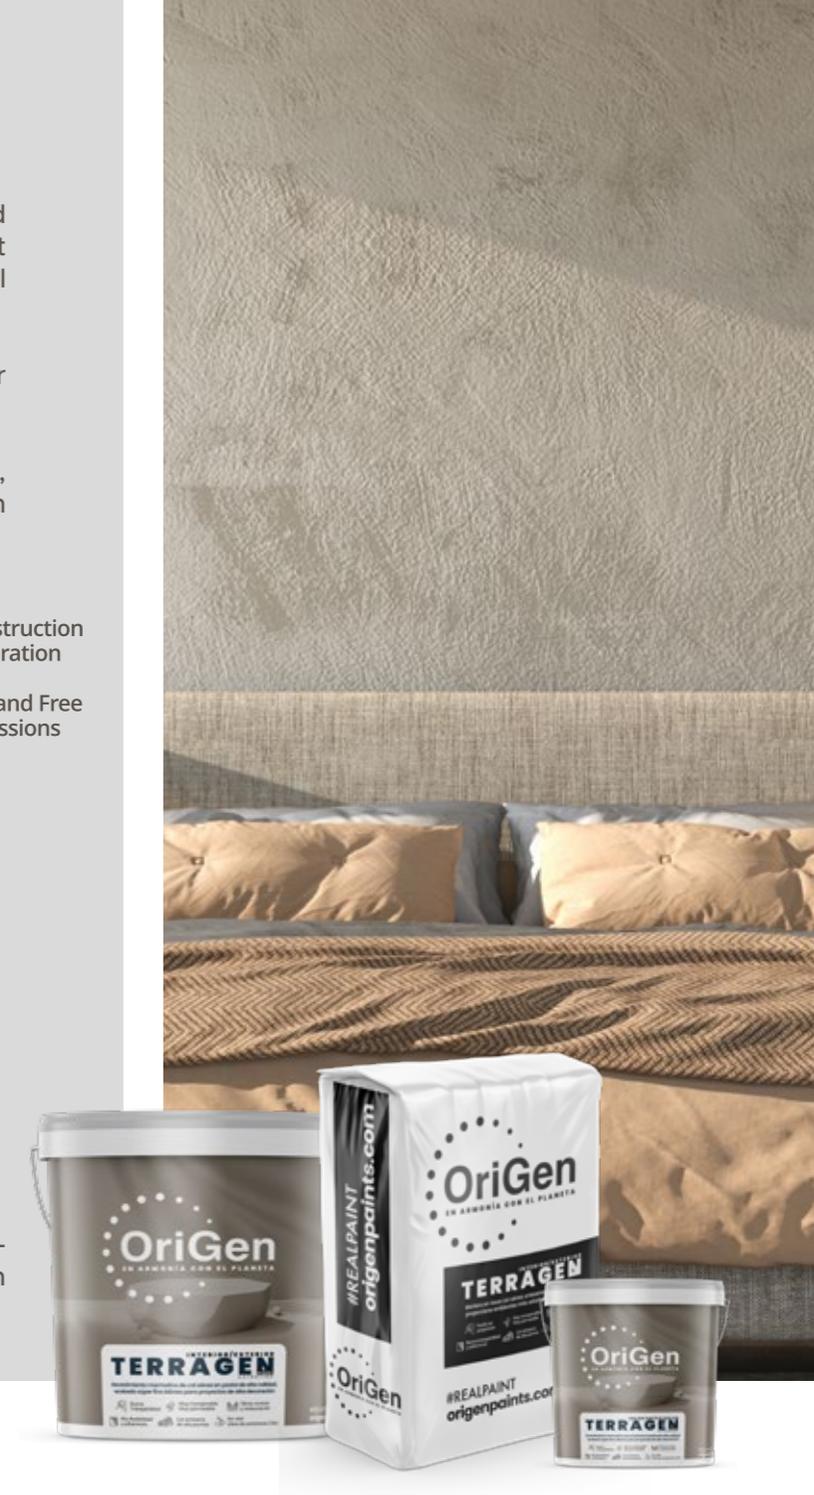

- Good workability.
- High flexibility, adhesion and resistance.
- Odourless.
- Reduces working time and material costs.

Advantages in the result:

- Mineral matt finish.
- Highly breathable. Prevents condensation.
- High water vapour permeability.
- Free of VOC and formaldehyde emissions.

Available colours: white and *Harmony* colour card.

Format: 15L bucket (ready-to-use product) or bi-component (4L bucket & 25kg bag - on demand in international markets).

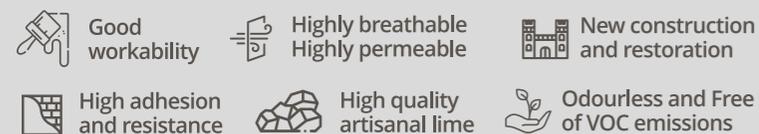

TerraGen Bi-Componente Extrafino

Aerial lime coating in paste form for interior and exterior use. Developed with **CACO3 technology**. This product is very resistant and durable with a marble-like superfine finish, ideal for high decoration projects.

In addition, it neutralizes CO2 and provides healthier and more sustainable environments.

Ideal for use in new construction, restoration, refurbishment of heritage buildings and high decoration projects.

Advantages in the application:

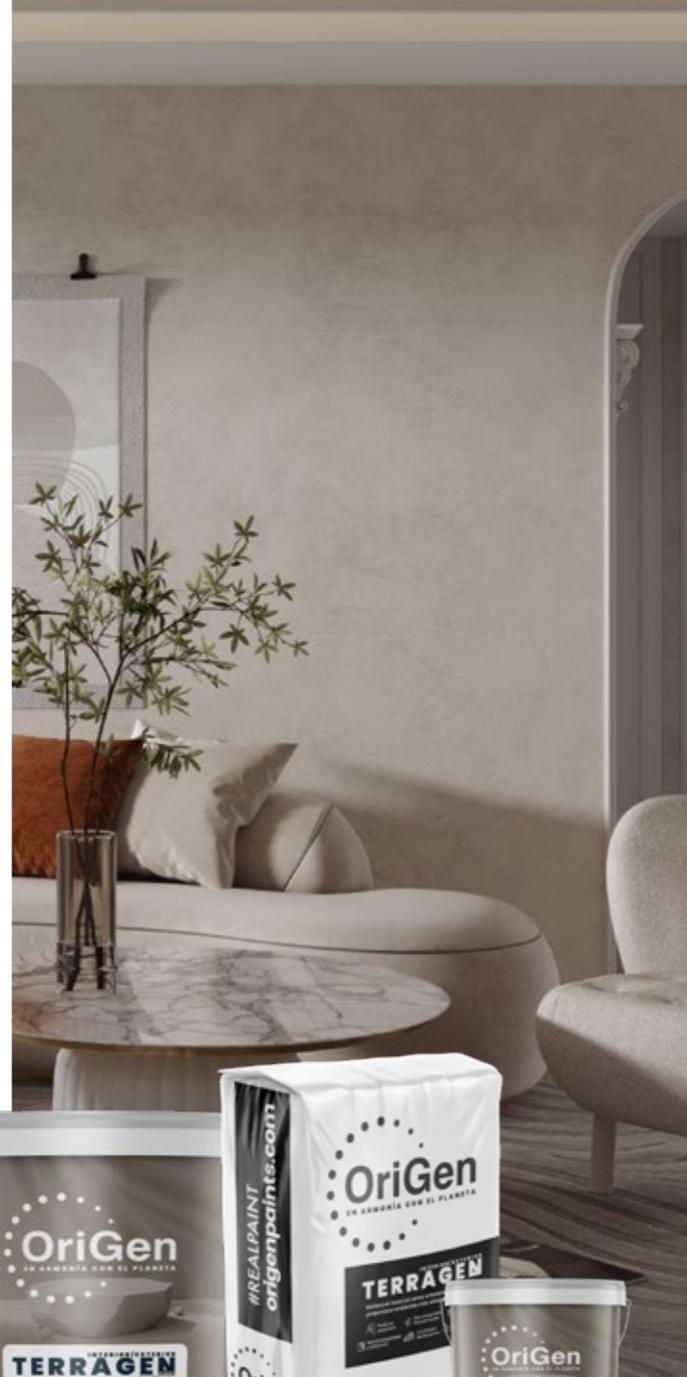

- Good workability.
- High flexibility, adhesion and resistance.
- Odourless.
- Reduces working time and material costs.

Advantages in the result:

- Mineral matt finish.
- Highly breathable. Prevents condensation.
- High water vapour permeability.
- Free of VOC and formaldehyde emissions.

Available colours: white and *Harmony* colour card.

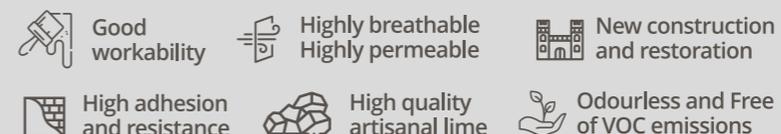

Format: 15L bucket (ready-to-use product) or bi-component (4L bucket & 25kg bag - on demand in international markets).

TerraGen Bi-Componente Adhesivo

Aerial lime adhesive mortar in paste form for interior and exterior use. It has a matt mineral finish, is highly breathable and provides healthier and more sustainable environments.

Developed with **CACO3 technology**. This product is highly resistant and durable, ideal as anchor for ETICS insulation boards, reparation mortar and tile adhesive. For use in new construction, restoration and in rehabilitation of heritage buildings.

Advantages in the application:

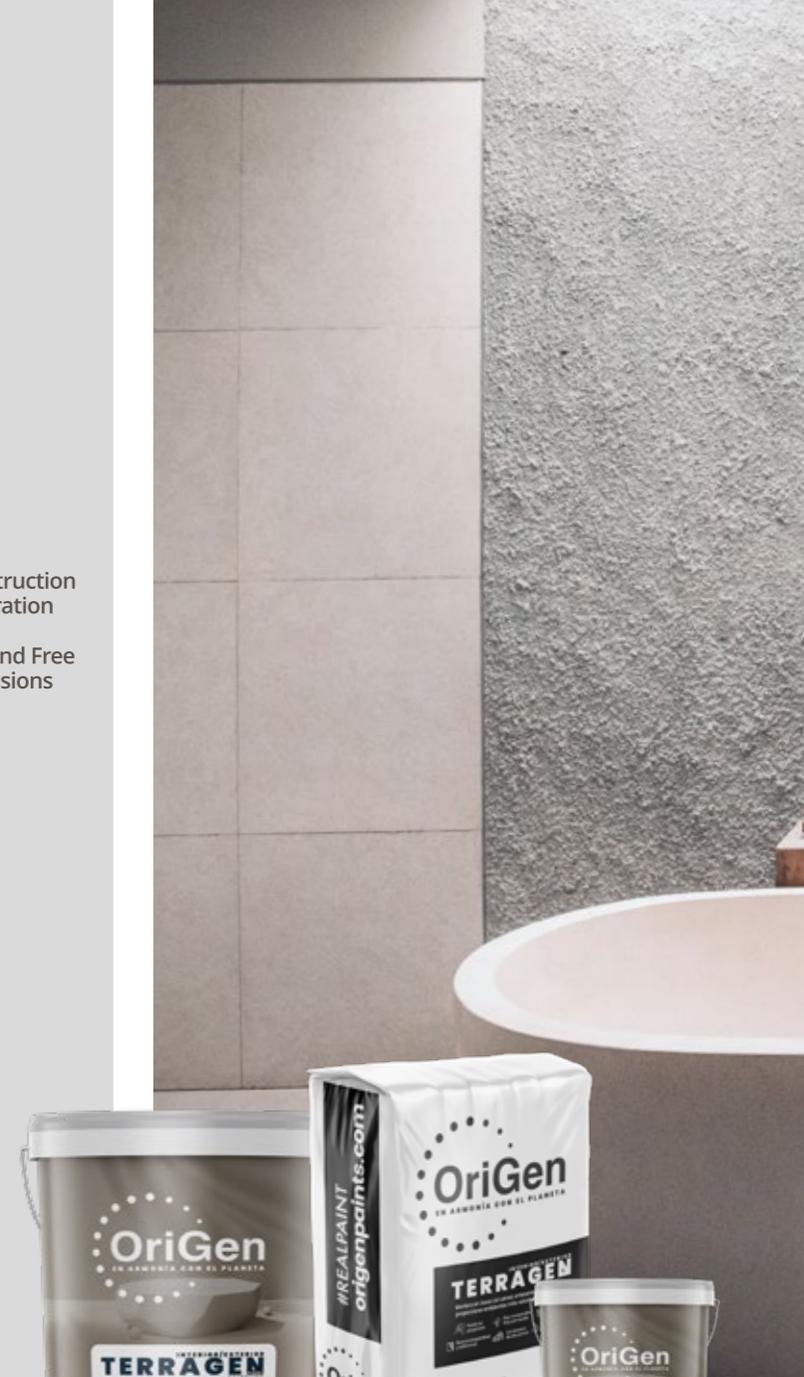

- Good workability.
- High flexibility, adhesion and strength.
- Odourless.
- Reduces working time and material costs.

Advantages in the result:

- Highly breathable. Prevents condensation.
- High water vapour permeability.
- Very resistant and durable.
- Free of VOC and formaldehyde emissions.

Available colour: sand white.

Format: 15L bucket (ready-to-use product) or bi-component (4L bucket & 25kg bag - on demand in international markets).
